Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Breslin (US 3,258,553) in view of German patent to Jacob et al. (DE 3214682).
4. The patent to Breslin discloses A vacuum hose fitting arrangement for central vacuum systems, the arrangement comprising a wall valve 15 connected to a central vacuum system and having an inlet receptacle 17, a vacuum hose 10 having a second end 14 connectible to cleaning attachments and a first end (adjacent 13) insertable into the wall valve inlet receptacle to complete a vacuum circuit, the fit between the vacuum hose first end and the wall valve being an "imperfect fit" and a rigid sleeve 13 fittable over the vacuum hose first end. Breslin does not disclose the sleeve having flex leaves so as to provide a snug insertion fit of the vacuum hose first end into the inlet receptacle. The German patent to Jacob et al. discloses (figures 1 and 2) a

pipe connection assembly having a vacuum hose 2 having a second end connectible to cleaning attachments and a first end insertable into a sleeve 8 that has flex leaves 33 (see figure 1) so as to provide a snug insertion fit of the vacuum hose first end into the inlet receptacle 5. Therefore, because these two connection assemblies were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute the connection assembly of Breslin for a connection assembly having a sleeve having flex leaves in view of the teaching of Jacob to ensure a secure, slip free connection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Albrecht, Hayden, and MacFarland show vacuum cleaner pipe connections having flexible leaves.
